

VERTICAL HIGH RISE FAN COIL - QUIET COMFORT BY DESIGN**4 PIPE STANDARD UNITS****MODEL TD, 350-1200 CFM****HOT WATER / CHILLED WATER**

Climetec's Vertical High Rise Fan Coil 4 pipe units can be quoted with or without the risers. The 4 pipe units are perfect for use in high rise condos, apartments, Long term care facilities C and hotels.

Both unit variations will arrive fully assembled. If risers are specified, they can be attached to the fan coil cabinet or shipped separately. A small footprint allows the units to be furred into columns, walls, or closets without the need for expensive horizontal connection piping.

All of our vertical fan coils meet the requirements of UL 1995/ CSA 22.2 #236- Standard for Safety heating and cooling equipment. Each unit is manufactured using high quality 18-gauge steel and is fully insulated with ½ inch fiberglass duct liner with acrylic coating and flexible mat reinforcement to provide a smoother air stream surface . Each unit is crafted with Industry Standard Electronically Commutated Fan Motors (ECM). The access panels are designed for easy access for maintenance. Each unit is equipped with a standard MERV 8 filter.

Benefits

- Double deflection supply air grille with opposed blade dampers
- 7 day programmable 3 speed wifi accessible thermostat
- Optional freeze protection package, flood protection package, drain pan overflow switch, BTU meter available (BTU meters are supplied via third party manufacturers, installed by Climetec at Climetec facilities)
- Raised bases available
- MERV filters can be upgraded to MERV 11 or MERV 13

4 PIPE STANDARD FAN COIL

Model TD 350-1200 CFM

HOT WATER / CHILLED WATER

Coil Options-

4 Row Chilled Water, 2 Row Hot Water

1. Supply Air Double Deflection Grille, 3 Sides Optional
2. Optional Side, Front or Top Opening, Sizes: 14x4, 14x6, 14x8, 14x10, 14x12
3. Supply & Return Shut Off Valve
4. Heating/ Cooling Valve Actuator
5. Combined Chilled and Hot

Water Coil

6. Fan Motor + ECM
7. Electrical Box + CW Disconnect
8. Swaged Riser Connection
9. Return Air Filter (Merv Air Standard)
10. Motor Access Panel
11. P-Trap
12. Drain Pan
13. Front Access Panel with RA Grille

Performance Range

Air volume

Fan Coil 350-1200 CFM @ 0.5 ESP

Thermal Performance

Fan Coil- Nominal ¼ to 3 ton cooling

Nominal 15 MBH to 84 MBH Heating

Dimensional Data					
Unit Size	A	B	L	H	Return Air Filter size
350	17.75"	18.25"	14"	48"	14"X20"X1"
450	17.75"	18.25"	14"	48"	14"X20"X1"
650	17.75"	18.25"	14"	48"	14"X20"X1"
