Perfect Solution for Replacing and Upgrading Aging Fan Coil Units

2 Pipe Retrofit Chassis for Vertical Fan Coil Unit, Blow Through Unit Only

MODEL RETRO2PFSTD350 RETRO2PFSTD450, RETRO2PFSTD650, RETRO2PFSTD800, 350-800 CFM

Hot Water / Chilled Water

Climetec's Retrofit Vertical Fan Coil Units are the ideal cost-effective solution for replacing and upgrading your existing fan coil units. These units are perfect for use in high rise condos, apartments, Long Term Care facilities, and hotels.

The units are manufactured to fit perfectly inside of your existing cabinet ensuring a minimal amount of effort is needed to upgrade your fan coil units.

Each unit is manufactured using 18-gauge galvanized steel and is crafted with Industry Standard Electronically Commutated Fan Motors (ECM). Further, each unit is supplied with a 24v Control box with wiring and control board and hardware including wing nuts for bowler mount.

*cabinet not included for this model; see model BR, BRS, BRE, CR, CRS, CRE

Optional Unit Additions:

- Belimo 2 or 3 way valve
- Optional electric heater element 1.0KW (2 pipe unit only)
- Optional flood protection package with flood sensor, 2 wire actuator, and a check valve
- Wifi colour-screen display thermostat.
